config.php - Notepad

File Edit View Convert Search Insert Help

1

<?php

2

/* Database Host Name */

3

\$db_host = 'localhost';

4

/* Database Username */

5

\$db_username = '';

6

/* Database Login Password */

7

\$db_password = '';

8

/* Database Name */

9

\$db_name = '';

10

/* Database and Session prefixes */

11

define('DB_PREFIX', 'myphpauction_'); ## Do not edit !

12

define('SESSION_PREFIX', 'myphpauction_');

13

?>

14

STEP 3 :

- Upload all files to your own hosting
- Run, installation to import auction database from your internet browser
<http://www.yourwebsite.com/install/>

BigDump: Staggered MySQL Dump Importer v0.34b

Filename	Size	Date&Time	Type	
AuctionDB.sql	270707	2012-06-15 09:20:56	SQL	Start Import into hybrid01_auctiontest at localhost

You can now upload your dump file up to 67108864 bytes (64Mbytes) directly from your browser to the server. You can upload your dump files of any size via FTP.

Dump file:

Note: The current mySQL connection charset is latin1. Your dump file must be encoded in latin1 in order to work with non-latin characters. You can change the connection charset using the \$db_connection_char in bigdump.php

Click => **START IMPORT** to import database, wait until process done.

Processing file: Auction-NEWDB.sql

Starting from line: 3025

	Session	Done	To go	Total
Lines	1038	4062	0	4062
Queries	73	184	0	184
Bytes	69497	282870	0	282870
KB	67.87	276.24	0	276.24
MB	0.07	0.27	0	0.27
%	25	100	0	100
% bar	<div></div>			

Congratulations: End of file reached, assuming OK

IMPORTANT: REMOVE YOUR DUMP FILE and BIGDUMP SCRIPT FROM SERVER NOW!

Thank you for using this tool! Please rate [Bigdump at Hotscripts.com](#)

You can send me some bucks or euros as appreciation via PayPal. Thank you!

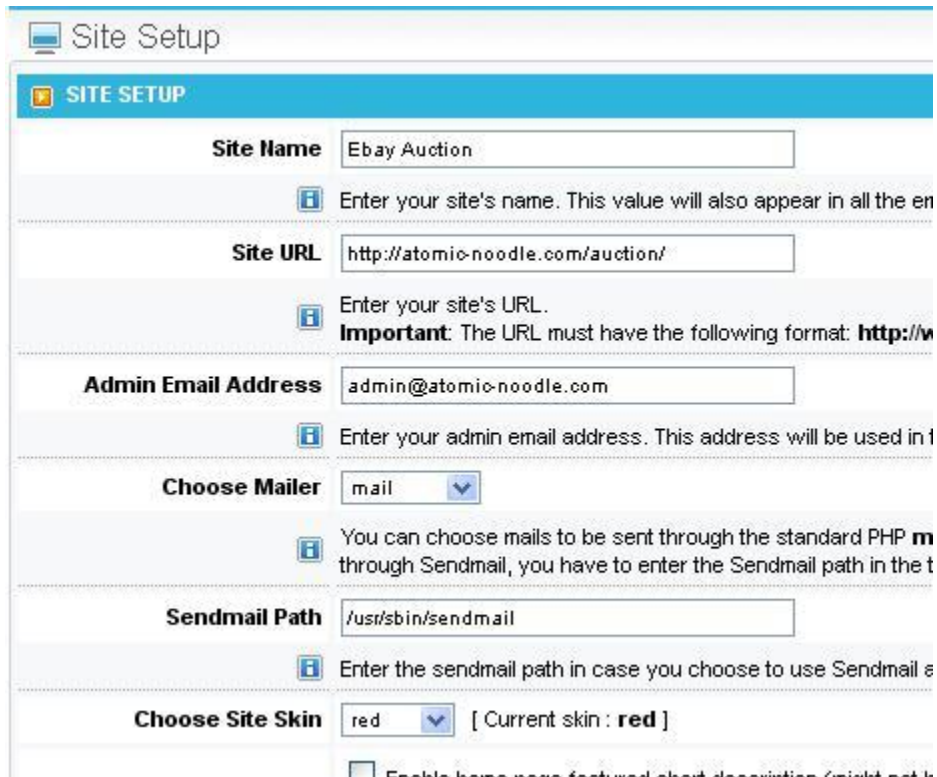

STEP 4 :

- Delete folder /install/
- Login into your Website Auction admin area:
<http://www.yourwebsite.com/admin/>
username : admin
password: admin

Click on => **SITE URL**

- Changes all setting into your own setting and website URL

DONE!
